

Being a Flight Attendant, I feel the use of cell phones is completely unacceptable onboard, due to safety reasons alone. Giving Terrorists the opportunity to communicate onboard, would be putting everyone, onboard and on the ground, in danger. Our government has allowed too much leniency and total complacency, which is why 9-11-01 even happen. Why would our government even consider this as an option? As far as the general public of the passengers, we, the Flight Attendants, have a hard enough time getting the attention of our passengers now. If you allow cell phone use, it would be ridiculously difficult to deal with them. WHY ARE WE EVEN CONSIDERING THIS AS AN OPTION? For the safety of all, the use of cell phones should not be allowed EVER during flight.
